

Technical sciences. I.P. Kondratenko, N.A. Zajets, V.M. Shtepa. **"Scientific foundations of the management of electrical engineering complexes of continuous production with the emergency situation prediction"**. Kyiv: Printeko, 2020. 256p. Circulation - 300 copies. ISBN 978-617-7876-17-4 UDK 004.896:681.518

The monograph presents the research results of the intelligent system of efficient operation of the electrical complexes of continuous production, taking into account their features as interconnected organizational and technological systems aimed at improving energy efficiency, resource conservation and productivity.

The monograph will be useful for specialists, who are engaged in the research and development of energy-efficient control systems for electrical complexes of continuous production, their modeling and forecasting of emergency situations, for graduate students, engineers and students of relevant specialties.
